3. "Schritte international" remains our standard course at elementary level for students abroad

The difference between the elementary level courses "Schritte international" and "Schritte plus"

Schritte international has been specially developed for teaching in **non-German-speaking countries**. **Schritte** on the other hand is intended for students already living in a **German-speaking country** or intending to do so for a longer period. Germany has just introduced a new curriculum and a new exam for participants in integration courses - the so-called "Deutsch Test für Zuwanderer". **Schritte plus**, the new revised edition of **Schritte**, puts these new requirements into practice. **Schritte international** on the other hand is not affected by these changes and we will continue to add components specially designed for use in other countries.

4. New grammar publications

For level A2 to B2

Großes Übungsbuch Deutsch - Grammatik

500 exercises of varying types to practise all important points of grammar give students more confidence in speaking and writing and help them to avoid mistakes. Amusing illustrations, photos and authentic texts help to motivate learners, while notes in the margin explain things to them and ensure success.

For advertising purposes, our new brochure "Learn Grammar with Hueber" is now available.

Übungsgrammatik für die Mittelstufe

The **Übungsgrammatik für die Mittelstufe** is a further development of the very successful **em Übungsgrammatik** for self-study learners. It follows modern teaching principles by dividing content into small steps and presenting them on facing pages: on the left the explanation and on the right the practice material. The **em Übungsgrammatik** on the other hand is an ideal extra for students using **em neu 2008**. It can also be used independently of any other course material.
