Preparation:

Copy enough sheets so that half the students get sheet A, and half the students get sheet B.

In class:

Divide the class into two groups A and B. Give one Student A sheet to each student in group A and do the same for group B with the Student B sheets. Give students a few minutes to look over the words and see how many they can get straight away. They can work together with other students in their group.

Then each student finds a partner from the other group and gives clues for the words they don't have.

Students can then return to their original groups of A and B and unjumble the keyword. If they need help, they can ask the other group for the keyword clue.

Extension activity:

Ask students to see how many short words they can make from each of the keywords.
